SUBJECT: SEINE TANKS

Dear Sir / Madam:

We have pleasure to introduce our company SEINE, manufacturers of Flexible Water Tanks in Spain since 1.996.

Our tanks are widely used in situations where a reliable, light, and easy to transport tank fits all requirements to store, treat and distribution of water and a wide range of liquids. Its minimum volume when empty and folded allows cheap transportation that can be moved easily at your convenience.

Pumping to fill in/out can be done either through the outlets or through top port.

The high tech fabric and the quality of construction has given us a good name and confidence from our customers in many countries. We have zero complaints for all our supplies. We are also registered and approved by UNICEF Supply from 2.000.

APPLICATION EXAMPLES:

- SEINE Bladder tank: As a closed tank is very suitable for drinkable water storage, disinfection of water, and some chemical storage. Not to use for very dirty water.
Applications: Relief, households, farms, fertilisers, hospitals, boats, hotels etc.

capacity: 0,7m³,1m³,2m³,,5m³,,10m³,12.5m³,15m³,20m³,25m³,30m³,50m³,80m³

- SEINE Bladder for Transport: like standard bladder but constructed with splash screen inside, to perform great stability during transport. Widely used to carry liquids in flat trucks, tractors, medium size boats etc.

Applications: Very easy and cheap transportation of liquids , avoiding extra investment in fix tanks.

Note on SBT: The use of the bladder tank for transport is restricted to emergency situations or in remote rural areas, farms or properties. SEINE denies any responsibility if our tanks are used in open roads or against national transport laws.

Capacity; 2m³,3m³,,5m³,10m³

- SEINE FLEXIBLE Onion Tank: Very convenient tank in any situation. To be used in any field. Just to deploy and fill in and out. The Onion model is a self standing tank that allows any use. Very much used for raw water and pre treatment. Easy to install, use and clean. This is an extremely stable tank that just need a flat surface to stand.

Applications: Relief, agricultural, dropping irrigation, livestock, fertilisers mixing, wells construction, public works etc.

Capacity: 5m³, 10m³, , 20 m³,25m³, 30m³ i 50 m³.

- SEINE TANK: This tank has served already in many situations where a very sturdy tank along with the easy installation have achieved full satisfaction from our customers. Is constructed only in one format of 33.6 m³. Takes only 45 minutes to install and uninstall and is very used on a long term basis. Just a flat surface of 7 x 7 meters and a standard 1/4" allen key is needed to deploy it.

Applications: Sedimentation and flocculation of water, Water disinfection, liquid storage, civil defence, farms, agricultural, industries etc.

All SEINE TANKS are checked and tested before delivery. SEINE TANKS are without maintenance and fully guaranteed. All SEINE TANKS are suitable for storage of drinkable water for human and animal consumption.

In case of need of repair, it can be easily done locally. A repair kit is available on demand.

Due its UV protection, all SEINE tanks can stand in extreme climates without any change of properties.

Petrol and related products are not allowed in the tanks.

Some background: : SEINE TANKS have been deployed in several projects in Spain, Holland, France, Honduras, Venezuela, Nicaragua, Peru, Guatemala, Mexico, Angola, G. Conakry, Sudan, Moçambique, Ethiopia, Sierra Leone, India, Pakistan, Afghanistan, Irak, Iran, Morocco, Haiti , Morocco, Egypt, Palestine, Libya, UAE, Sri Lanka and Indonesia during post Tsunami operations.

SEINE EXPORT

SEINE has developed aside, a department of procurement and export services to serve customers anywhere, focussing on support relief organisations with suitable goods and after sales service.

Regular Supplies:

- Lombardini Pumps. (Diesel)
- Lombardini portable Gensets (Diesel)
- HONDA brand Pumps and Gensets. (Petrol)
- Flexible reinforced and Flat hoses.
- Submersible Pumps (Grundfos)
- Electrical starters and frequency variators.
- Self closing taps, fittings and couplings (Guillemin, Storz etc)
- Brass and Inox Valves.
- Electrical material.
- Solar Panels and related material.
- Gel batteries.
- Plastic Squatting slabs.
- Foldable Jerrycans 20 l.

SEINE is a registered company in UNICEF , ICEX Spain, Alertnet and in the main international relief agencies.
